SUMMARY

Experienced Quality Analyst with 2.5 years of expertise in testing software applications. Proficient in both manual and automation testing, dedicated to delivering high-quality results while continuously enhancing testing processes for improved efficiency and effectiveness.

EXPERIENCE

Assistant Software Engineer (QA & Tester)

Unicode Systems Pvt. Ltd. 📅 05/2023 - Present 📍 Lucknow, India

A leading software solutions provider focusing on quality assurance and testing.

- Created detailed test plans, test cases, and documented results.
- Collaborated with development teams to identify issues and ensure quality standards.
- Designed, developed, and executed automation scripts using industry-standard frameworks and tools to reduce manual effort and improve test efficiency.
- Conducted functional and regression testing for various websites.
- Utilized bug tracking and test management tools (e.g., JIRA, Orange Scrum) to log defects and track resolution.
- Participated in Agile/Scrum ceremonies (daily stand-ups, sprint planning, and retrospectives) to provide testing input and align QA processes with project goals.

PROJECTS

Hospital Information Management System (HIMS)

- HIMS is an integrated system that streamlines hospital operations, including patient management, billing, lab, pharmacy, admin, HR, and many more to enhance efficiency and care.
- Tested and ensured the quality of HIMS modules, including OPD, IPD, ICU, OT, Emergency, Billing, Lab, Pharmacy, Inventory, Admin, HR, and CSSD.
- Performed manual and automated testing, identified bugs, and collaborated with development teams to ensure smooth system functionality and integration.
- Designed and executed test cases, performed API testing with Postman, and tracked defects using JIRA to ensure reliable assessments.

Resource Time Management System (RTMS)

- Developed and tested modules for Employee Onboarding, Daily Work Log, and Punch In/Punch Out to track work hours and attendance.
- Validated Attendance management, Regularization of work hours, and Role-based Permissions for multiple user logins (Employee, HR, Manager, Admin).

Enterprise Resource Planning (ERP)

- Tested modules including Inventory, Sales, POS, and HR to ensure accurate business process execution.
- Validated Vendor Creation, Purchase Orders (PO), Invoice Reference Numbers (IRN), Goods Receipt Notes (GRN), Return POs (RPO), and Return GRNs (RGRN).
- Performed functional testing of Gate Pass workflows (NRGP, RGP, Scrap) and validated discount/offer management.
- Verified report generation and data accuracy across different business modules.
- Tracked bugs using Orangesrum.

SKILLS

Hard Skills

Manual Testing Automation Testing

Test Case Development

Defect Management (JIRA/Orangesrum)

Postman JMeter Selenium with Java

Selenium with Python Playwright

Cucumber TestNG Java Git JIRA

Jenkins Docker Burp Suite

Bug Tracking & Reporting

Functional Testing Non-Functional Testing

Agile & Scrum Methodologies

📅 2016 📍 Kanpur, India

PROJECTS

Human Resource Management System (HRMS)

- Tested and ensured the functionality of the Employee Onboarding module, streamlining new hire processes.
- Managed and validated the Attendance module for accurate tracking and reporting.
- Worked on the Shift Roster feature, enabling efficient scheduling and shift management.
- Configured and tested Holiday Settings to ensure correct holiday allocation and compliance.
- Validated Leave Management to automate and simplify leave requests, approvals, and tracking.

Candidate Evaluation Systems (CES)

- Worked on the Candidate Evaluation System (CES) module covering Question Creation, Test Scheduling, and Automated Evaluation.
- Validated Test Scheduling, Result Generation, and Role-based Permissions across multiple user roles (Admin, Candidate, Evaluator).
- Designed and executed test cases, performed API testing with Postman, and tracked defects using JIRA to ensure reliable assessments.
